## Head of Quality MedTech

### German engineering meets global growth in MedTech!

Our client is a leading specialist in high-quality plastic solutions for the global healthcare sector. The company combines German innovative strength with a state-of-the-art, expanding production site in Romania. There, around 250 dedicated employees ensure the highest quality standards and drive the international growth of this emerging industry leader.

### Your Tasks

- **Team Leadership:** Disciplinary and technical development of the 8-member quality team.
- **Quality Management:** Responsibility for operational quality management and the consistent implementation of all quality guidelines.
- **Process Optimization:** Continuous adjustment and further development of the existing Quality Management System (QMS).
- **Audits:** Independent planning, execution, and evaluation of internal and external audits.

### Your Profile

- **Education:** Technical degree or equivalent vocational training with a specialization in Quality Management.
- **Experience:** Proven leadership track record and deep expertise in the medical device industry.
- **Regulatory Expertise:** Experienced in relevant standards, especially ISO 13485.
- **Languages:** Proficiency in Romanian and English (written and verbal).
- **Soft Skills:** Quality-driven mindset, proactive hands-on approach, and strong communication skills for interfacing with internal and external stakeholders.

### What our client offers you

- **Scope for Impact:** A diverse and responsible role with the creative freedom to implement your own ideas.
- **Autonomy:** Flat hierarchies that empower you to actively shape decision-making processes.
- **Future Prospects:** An innovative, future-oriented company offering long-term development opportunities within an exciting growth market.
